-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 6, 7, 9, 12, 13, 15-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Culbertson et al.

Culbertson et al. discloses a spray gun comprising: a spray gun body 1b with a trigger mechanism 5, spray head 16 including a hollow body, an insert 13 having an axial bore, a nozzle 10 at the front end, a reusable liquid reservoir (not shown) connecting to an inlet fitting 20, air outlets 9 arranged on opposite sides of the nozzle, wherein an end of the hollow body and a front end of the spray gun body are provided with mateable formation (see figures 5 and 7), means 14 for controlling the air stream.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Culbertson et al. in view of McRitchie (US Patent No. 3,236,459).

Culbertson et al. teaches all the limitations of the claims except for a bayonet connection for the head and the reservoir. However, McRitchie discloses a liquid spraying apparatus having a spray gun body 10, a spray head body 210 that is releasably connected at a rear end to the spray gun body 10, wherein the spray head body 210 and a front end of the spray gun body 10 are provided with a bayonet mateable formation 106/107/108/118/120, a reservoir 18 mounted on the spray head 12 with a bayonet type connection 154/158 (see figure 5). Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Culbertson et al. with a bayonet connection for the head and the reservoir as suggested by McRitchie. Doing so would provide a quick and easy way to assemble and disassemble.

5. Claims 3-5, 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Culbertson et al. in view of Holt.

Culbertson et al. teaches all the limitations of the claims except for a remote reservoir that is connected by a flexible hose and a manual shut off valve. However, Holt discloses a spray gun 88 connected to a remote reservoir by a flexible hose 86 that has a manually operated valve 32. Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Culbertson et al. with a remote reservoir that is connected by a flexible hose and a manual shut off valve as suggested by Holt. Doing so would provide an effective spraying system (see column 3, lines 15+).

With respect to claim 10, and 11, to have a reservoir that is disposable or collapsible is well known within the art and is obvious to one skilled in the art.

Response to Arguments

6. Applicant's arguments filed 3/28/07 have been fully considered but they are not persuasive.
7. Applicant's arguments with respect to claims 1-13, 15-20 have been considered but are moot in view of the new ground(s) of rejection.
8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

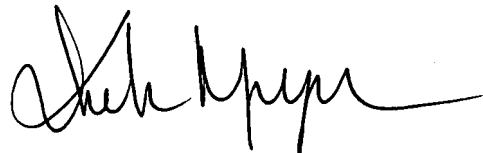

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dinh Q. Nguyen whose telephone number is 571-272-4907. The examiner can normally be reached on Monday-Thursday 6:00-4:30.
